F	49		

StolComfort OPERATOR An extremely stable and comfortable swivel office chair which is particularly suitable for use in control rooms and other working environments operating around the clock. The ergonomically shaped cushions are based on a design developed for the commercial vehicle sector, where comfort and resilience are paramount. They prevent muscular tension and so help staff concentrate on their work. The mechanism is certified for 24-hour use and promotes a healthy and active posture while sitting, thereby protecting the back and intervertebral discs. The controls

for adjusting the height, weight and backrest angle are positioned within comfortable reach and are easy to use. You can choose between fabric, fabric/leather mix and full leather seat covers, all in various colours. Materials are all easy-care and sufficiently resistant to withstand 24-hour use. Useful optional extras such as alternative armrests, headrests and protective covers are available. You will find a list on the back of the product information sheet.

Product datasheet OPERATOR MODEL
